

On Earthquakes Preparedness in Israel

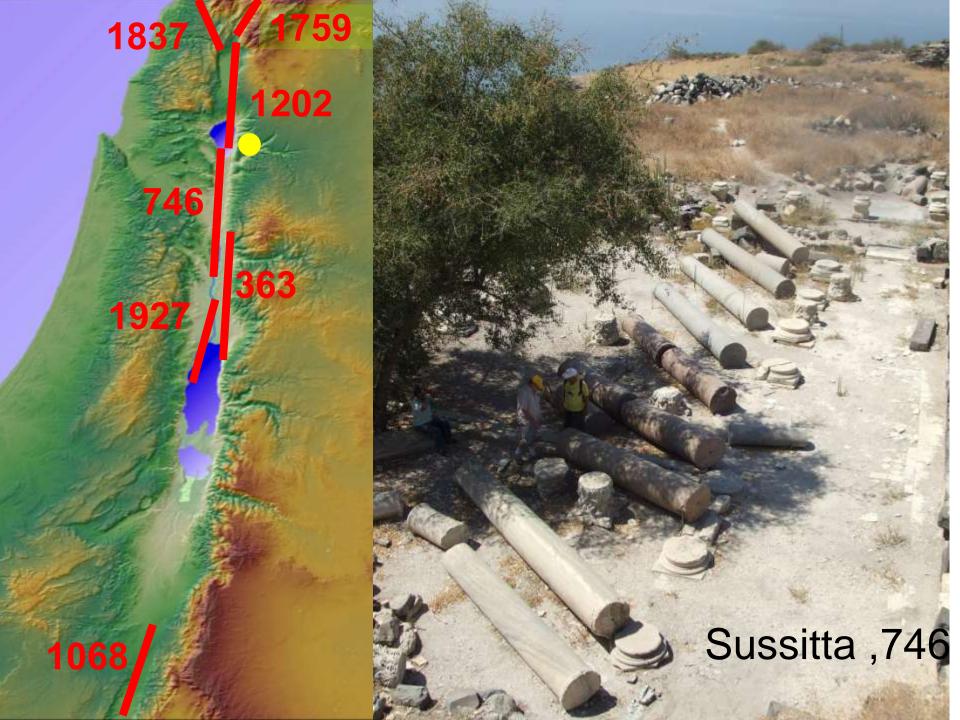

Dr. Avi Shapira

Chairman of the Steering Committee

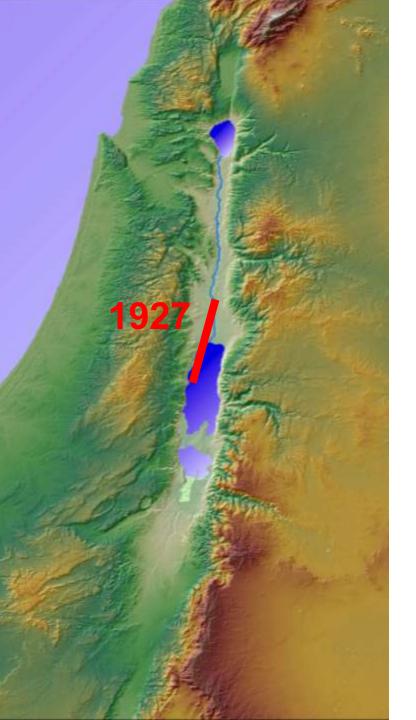

The Dead Sea Fault System

Jericho

Nablus

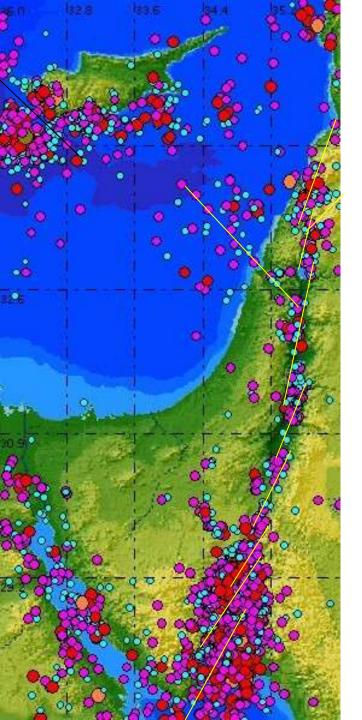

Gulf of Aqaba/Eilat, 22 November 1995, Mw=7.2

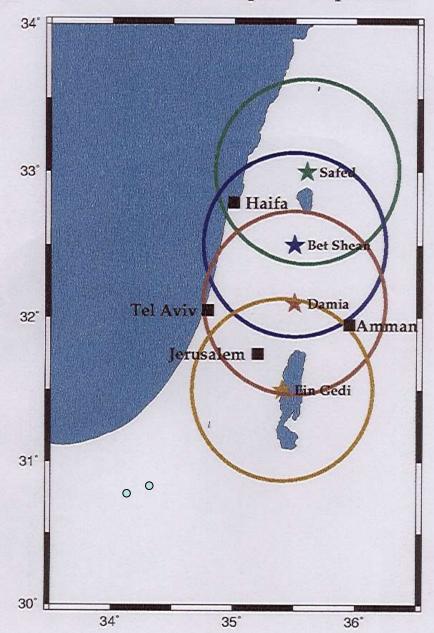

Ministry of National Infrastructures
Inter-ministerial Steering Committee for
Earthquake Preparedness

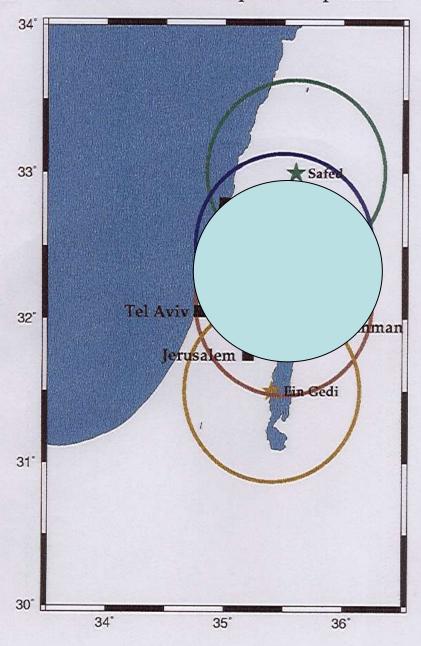

Earthquake Epicenters located by the Israeli Seismic Network (1980-2005)

Radii of 70 km around potential epicenters

Radii of 70 km around potential epicenters

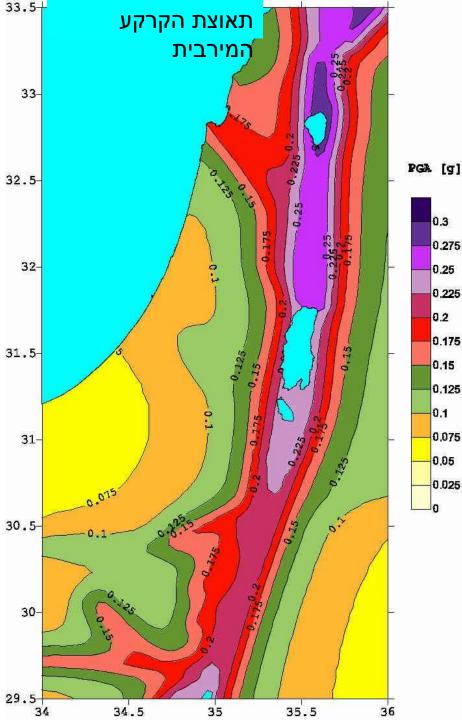

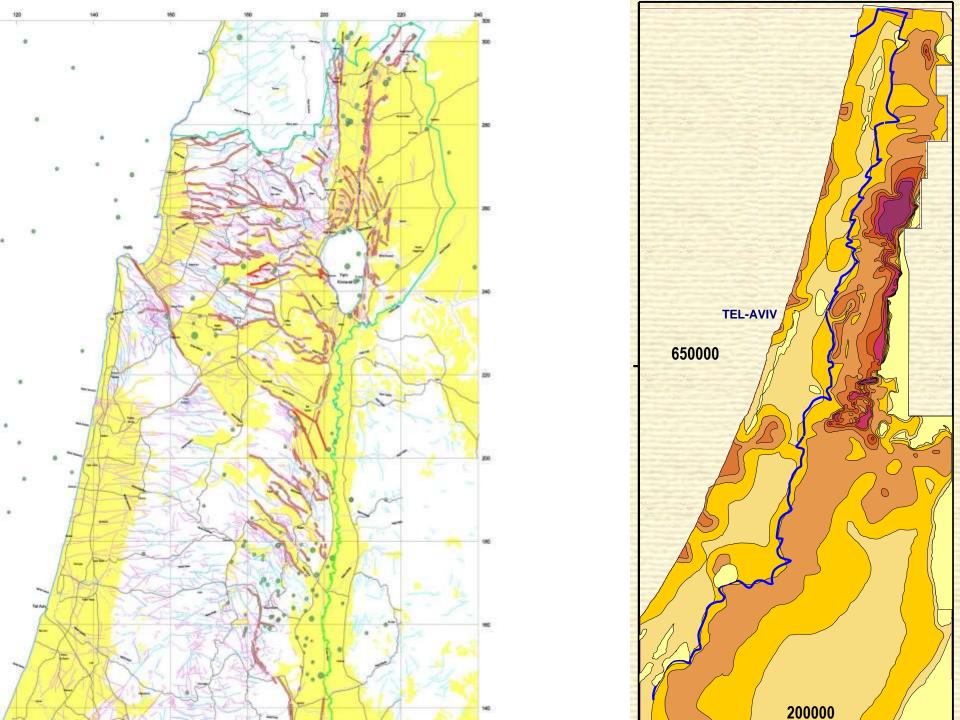

EARTHQUAKES DO NOT KILL, BUILDINGS DO!

Ministry of National Infrastructures
Inter-ministerial Steering Committee for
Earthquake Preparedness

FOCUS ON
PREVENSION AND
MITIGATION
RATHER THAN ON
RESPONSE

•Instructions for land use planning (identification of seismic & geological hazards).

•Regulating Risk Management programs in the industry.

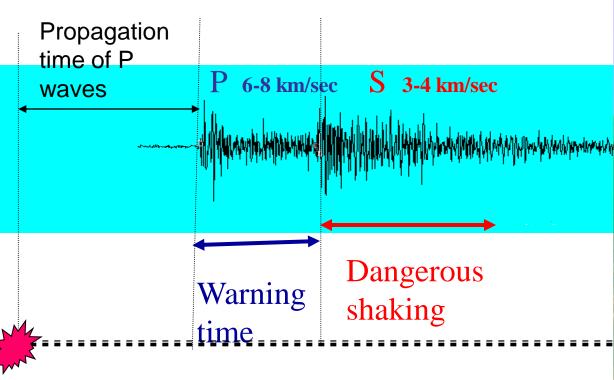

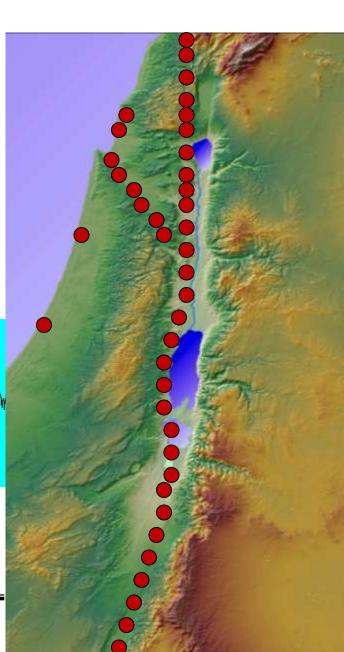

STRENGTHENING EXISTING BUILDINGS

- New technologies.
- •Government buildings.
- •National Plan for private dwellings.

No Prediction but Possible real time warning

If we do not prepare for earthquakes

we have to prepare for a disaster!

Life saving:

- Civil Search and Rescue teams
- •Immediate damage assessments. (Real Time Earthquake Scenario)

Awareness

What to do before, during and after.

The prime responders to an Earthquake catastrophe are the Local Authority and the Local Population
